Parking Guidance System

(Malls, Airports, Commercial Spaces, Tech Parks)

WISEGO's Parking Guidance System is a smart, sensor-based solution that optimizes the parking experience by guiding drivers to available spaces quickly and efficiently. Designed for modern parking facilities, our PGS minimizes congestion, reduces search time, and enhances overall customer satisfaction.

Benefits

- Reduced Search Time & Traffic Congestion
- Improved Parking Turnover & Efficiency
- Enhanced User Experience
- Lower Emissions Due to Reduced Idling
- Comprehensive Data Analytics for Planning & Reporting

Key Features

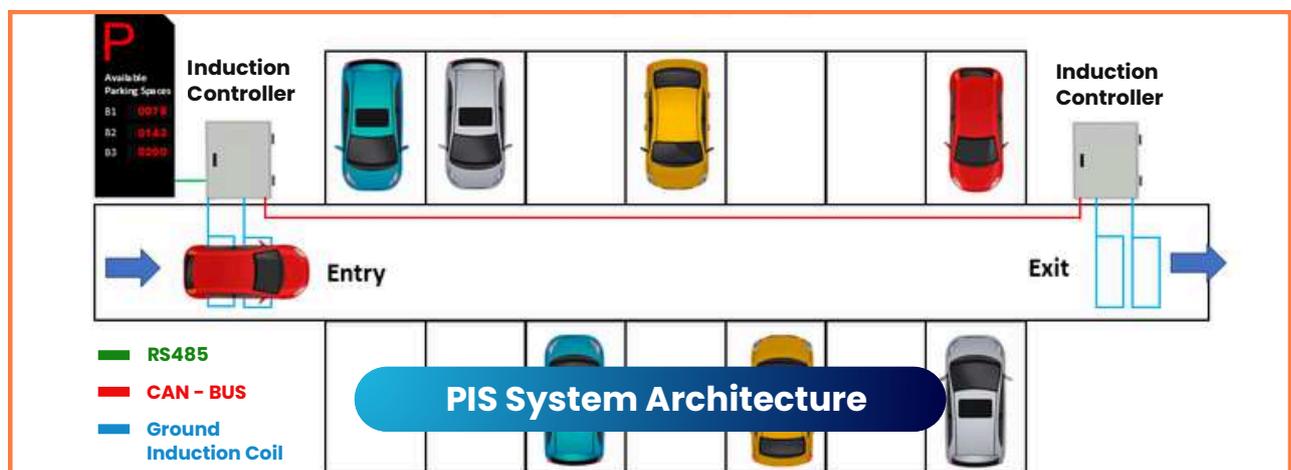

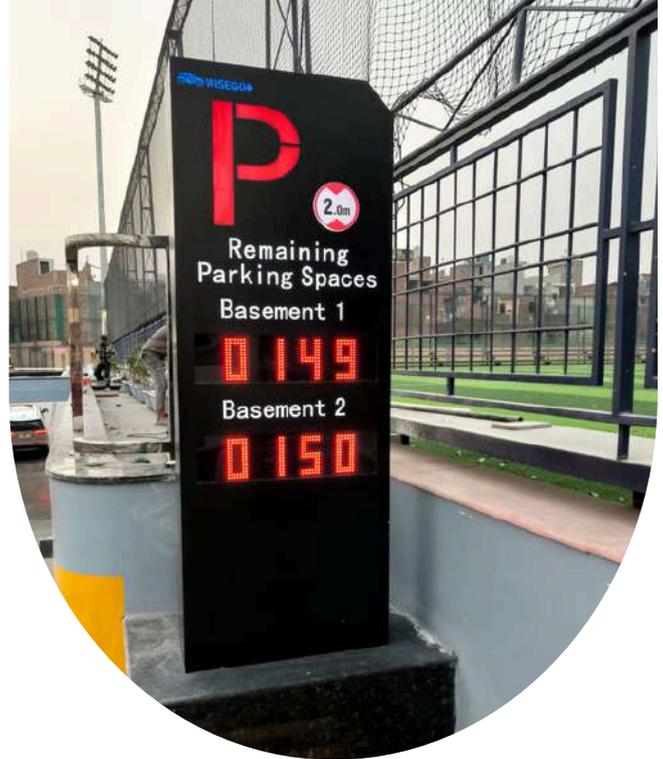

- Ultrasonic or Camera-Based Sensors
- LED Indicators (Red/Green/Blue)
- Zone-Wise Occupancy Displays
- Central Monitoring & Control Software
- ANPR Integration (Optional)
- Mobile App Support (Optional)
- Real-time data on parking occupancy
- User Friendly Dashboard
- Find my Vehicle Option Available

Parking Information System

(Corporate Spaces, Universities, Hospitals)

A Parking Information System (PIS) in the MLCP helps users quickly locate available parking slots on each floor, enabling faster access and reduced search time. PIS helps visitors move smoothly within any premises—be it a mall, airport, hospital, IT park, or commercial complex by providing real-time guidance and reducing confusion.

Benefits:

- Facilitate Smoother Traffic Flow
- Reach a Parking Slot Faster
- Delighted Visitor Experience
- Enhanced Safety & Security
- Accessibility Support

Vehicle Access Management System

(Corporate Spaces, Residential Spaces)

WISEGO's Vehicle Access Management System offers a modern, digital approach to handling guests, contractors, and deliveries—ensuring a safe, efficient, and professional experience at your facility. Our solution replaces outdated system with a smart, automated platform that enhances security, saves time, and leaves a lasting impression.

Key Features

- Set Tenant Quota & Relax
- Tenant Login Access to Manage on their Own
- Data Analytics on Tenant Vehicle flow
- Improved Security & Compliance
- Faster Check-in Experience
- Real-Time Visitor Logs & Reports
- Blacklist Facility if required

Swing Barrier Gates

(Commercial, Aiports, Metro Station)

WISEGO's Swing Barrier Gates offer a secure and elegant solution for controlling pedestrian access in high-traffic areas. Designed with a focus on safety, aesthetics, and reliability, these gates are ideal for modern entry management across commercial, residential, and institutional spaces.

Key Features

- Bi-Directional Movement:
- Access Control Integration
- Fast & Silent Operation
- Safety Sensors & Anti-Tailgating
- Emergency Mode
- High-quality electrical components.
- All smooth finish, no exposed screw
